

South Coast Air Quality Management District

Workshop on Draft 2014 Annual Network Plan

June 19, 2014 • 2pm to 4pm

**South Coast Air Quality Management
District Headquarters**

Room GB

21865 Copley Drive, Diamond Bar, CA 91765

Background

The Annual Air Quality Monitoring Network Plan describes the network of ambient air quality monitors located within the SCAQMD's four county jurisdiction. The Plan includes a review of actions taken during the previous fiscal year, and outlines plans for action in the year ahead.

Federal regulations require that the air quality monitoring network be reviewed annually to identify any need for additions, relocations, or terminations of monitoring sites or instrumentation. After a 30-day comment period, the Plan is submitted to the U.S. Environmental Protection Agency (U.S. EPA) on July 1 of each year.

Annual Air Quality Monitoring Network Plan Workshop

Pursuant to Federal regulations, a draft plan of the 2014 Annual Air Quality Monitoring Network Plan will be made available by May 31, 2014 for public inspection and comment prior to the submission of the final plan to EPA on July 1, 2014. SCAQMD seeks public input to the plan. The Federal requirements and an overview of the plan will be discussed along with the results of the comparability assessment for PM_{2.5} Continuous Monitors.

Agenda

- *Federal Requirements*
- *Monitoring Network Infrastructure*
- *Minimum Monitoring Requirements*
- *Special Programs*
- *Recent and proposed Modifications to the Network*
- *PM_{2.5} Continuous Monitor Comparability Assessment*
